

bpmn-js

BPMN 2.0 rendering toolkit and web modeler.

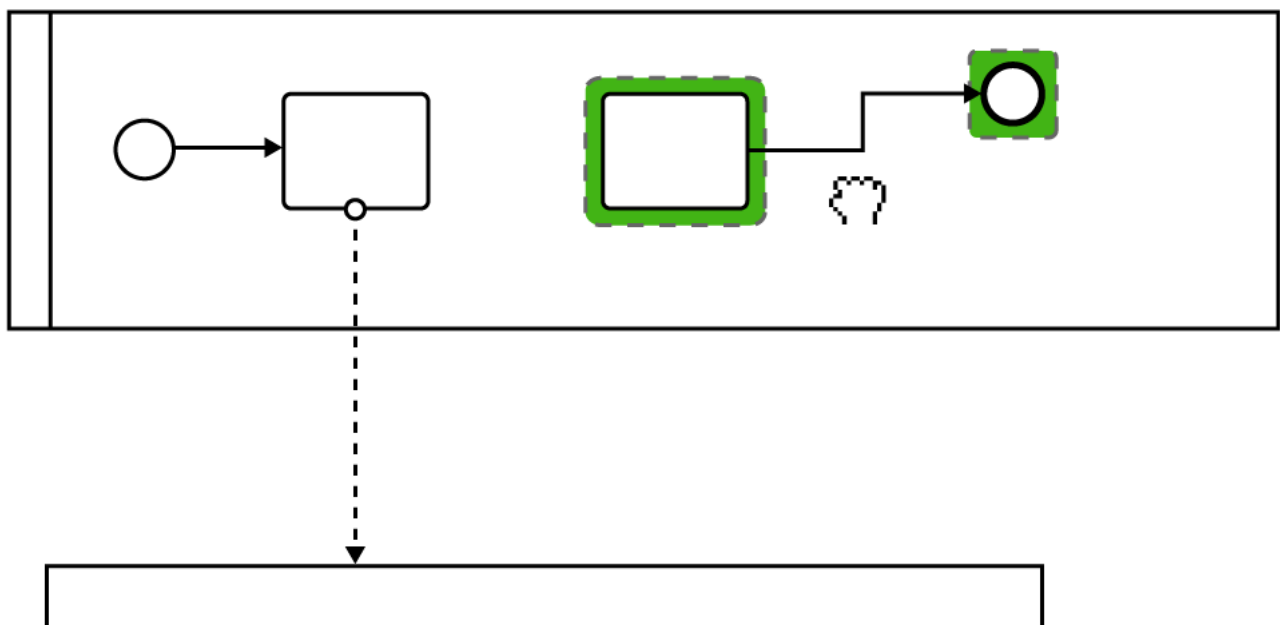

Try Online (<http://demo.bpmn.io>)

Download ([download](#))

Currently v0.25.0. View on GitHub (<https://github.com/bpmn-io/bpmn-js>).

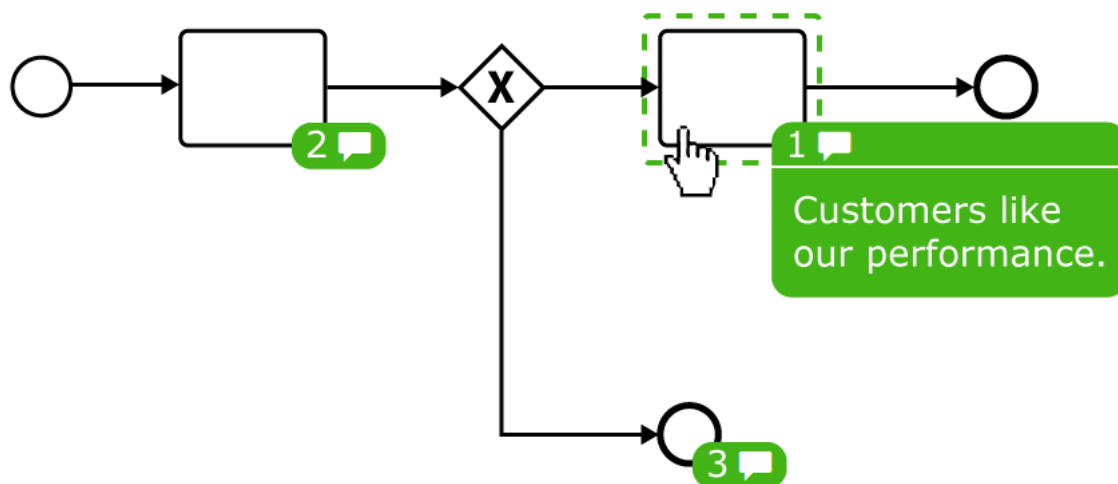

BPMN everywhere, for everyone

Create, embed and extend BPMN diagrams in your Browser. Use it standalone or integrate it into your application.

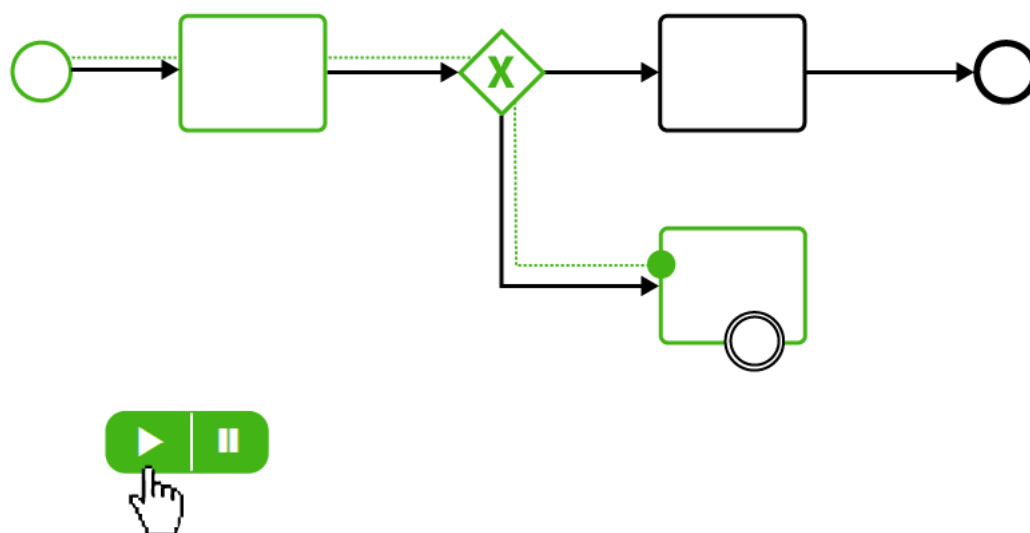

Model

Easily create your own BPMN 2.0 diagrams using a web-based modeling component (<http://demo.bpmn.io>).

Embed and Annotate

Use the toolkit to embed BPMN 2.0 diagrams into your applications. Enrich them (<https://github.com/bpmn-io/bpmn-js-examples/tree/master/commenting>) with the data that is important for you and your business.

Extend

Integrate an in-browser process engine, token simulation, styling (<https://github.com/bpmn-io/bpmn-js-examples/tree/master/colors>) or enhanced interactivity (<https://github.com/bpmn-io/bpmn-js-examples/tree/master/custom-modeling-rules>). It is up to you because bpmn-js is an open toolkit.

Add BPMN to your Application

Embed BPMN diagrams in your application with a few lines of code.
