

Command to stop ng-serve

[Ask Question](#)

0

because I need to stop it by using script which need to support both window and mac. Please help me to figure out.

angular

maven

pom.xml

try following if you're using Linux

```
sudo killall ng
```

progress on port
4200:

```
sudo kill $(sudo ls
```

I have a
question, Is this
command also
for window? –

[Kullanit Na nongl](#)

In cmd.exe try to
find PID of port
4200: netstat -
ano | findstr
:4200 Then kill
the process
which has
Property
"LISTENING"
with this
command(numb
er in command
can differ):
taskkill /PID
15940 /F –
