Camunda EE

Roadmap

Camunda Community: Foundation Stack

Camunda Enterprise: Full Stack and Services

Avoid Risks

More Success

Camunda Enterprise Value for Project Phases

	Design	Implement	Operate	Improve
Cawemo	Design BPMN collaboratively Communicate to Stakeholders Receive Feedback and change Design			
Optimize			Provide KPI Reports Setup Alerts	Find Weak Spots Identify Root Causes
Cockpit EE	Prototyping	Testing	Inspect History Data Handle Incidents Version Migration	
CSM / Consulting	Learn BPMN/DMN Learn Camunda Architecture Review	Model Reviews Code Reviews Best Practice Patterns	Tech Setup Reviews	BI Best Practices Suggest Improvements Communicate Success
SLA Support		How-to Questions Bug Reports Feature Requests	Understand Behavior Bug Reports Feature Requests	

Community or Enterprise?

	Choose Community , if...	Choose Enterprise , if...
Solution Complexity	Low	High
Criticality to Business	Low	High
Project Urgency	Low	High
Developer Resources	Abundant	Scarce

Camunda Community Platform is sufficient, if:

- Automation solution is not complex and/or not business critical
- Time to market is not an issue (low urgency for solution delivery)
- Developer resources are available in abundance

Camunda License Model

Flexible license model...we grow at your projects pace.

- Perpetual License Subscription
 - Enterprise Software License (Product Stack)
 - Service and Support Agreement
 - Fees are project/volume based

Support Options

All Enterprise Support Agreements Include

- Standard SLA support
- Support ticketing system
 - Unlimited support tickets
- Contingent of Remote Consulting Hours
- Support Contacts
- Contractual Warranties
- Maintenance and Patch Releases
- Access to consulting and training services

Optional

- Advanced SLA (24x7x365)
- Additional Remote Consulting Hours
- Additional Support Contacts
- Kick off training
